

WHITE PAPER

INDUSTRIAL INDEXING
SYSTEMS, INC.

System Upgrade & Retrofit Services

At Industrial Indexing Systems, we have many years of experience with factory automation upgrades and retrofits.

Factory automation system design and fabrication services offered by Industrial Indexing Systems are completely integrated systems that are designed from motor shaft to automation controller.

The performance of existing production lines can be enhanced by integrated new servo technology.

Retrofit System Design & Fabrication

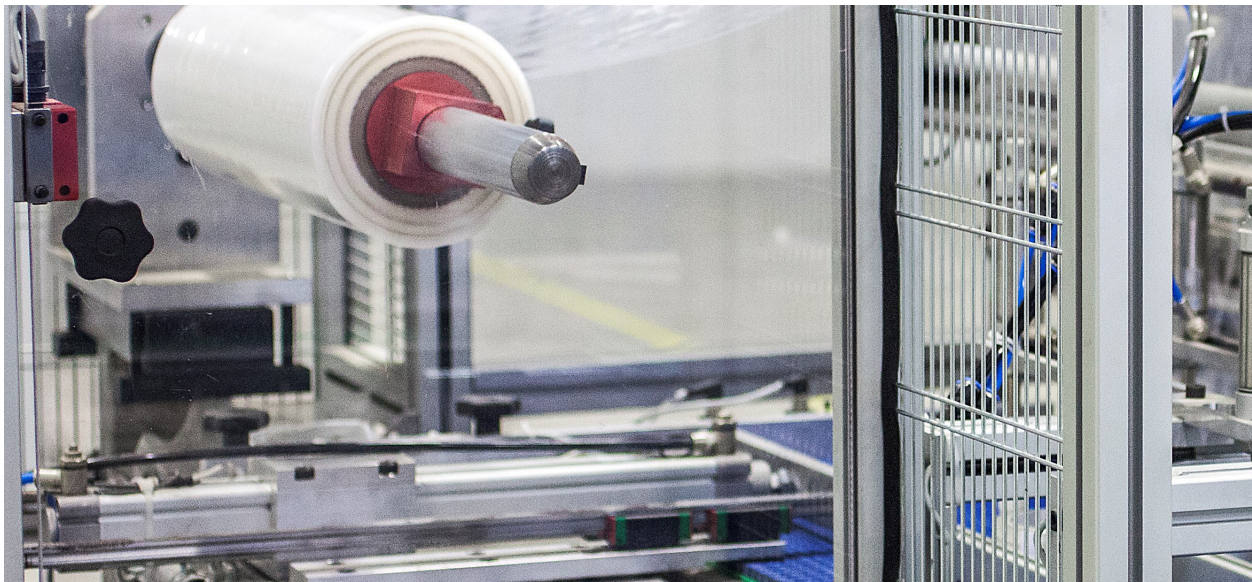

As machinery ages, maintenance and repair becomes costly and, at times, impossible if spare parts are unavailable. When this happens, we have the knowledge of existing applications and offer support in upgrading and retrofitting outdated motion controllers, servo drives, and motors with current technology.

IIS factory automation upgrade and retrofit services begin with an upgrade strategy, which includes research and designing pre-engineered packages. Older systems and equipment developed by Industrial Indexing Systems can be upgraded to the newest technology available and all software is completely transferable. We offer upgrade packages for hydraulic or servo driven blow molding, thermoforming, paper and film converting, and multi-needle quilting machines.

Upgrading and retrofitting to modern technology is a proactive plan to minimize downtime and decrease production losses. Upgrades increase system performance and will prolong the life of capital equipment.

Listing of Capabilities

- | | | |
|---|--------------------------------|---|
| - Engineering Services | Development | - Post-Sales Technical Support |
| - Application Engineering | - Build to Print | - Hardware / Software Training |
| - Machine Control Integration | - Machine Design and Build | - Online Repair System for Industrial Indexing Systems, TOEI-Velconic, and Toshiba/Shibaura Machine Equipment |
| - Drive Design | - Panel Design and Fabrication | |
| - Controller Design | - Field Installations | |
| - Operator Interface Screen Development | - Machine Commissioning | |
| - Motion Software | - Pre-Sales Technical Support | |

Experience with a wide range of motion control systems provides knowledge for assisting new customers.

Team IIS

Our objective is to bring state-of-the-art servo system products to practical use on the factory floor. Whether it is a complete turnkey system or servo components, IIS' commitment to quality products and personalized support is unsurpassed. Our business philosophy is pretty simple. We take responsibility for everything we sell. By doing that we make a long-term commitment to our customer's success.

Headquarters in Victor NY

To accommodate the steady growth we've enjoyed over the years, our facility has been expanded several times to its present 17,000 square foot capacity. This location houses all critical departments - Sales, Marketing, Applications Engineering, R&D, Production, Warehouse, Panel Shop, Quality Control and Customer Support. Having everything under one roof speeds communications and provides better service to our customers.
